-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishizawa et al. U.S. Patent 5,910,010 A.

Nishizawa et al. discloses a method of molding semiconductor assemblies on multiple semiconductor substrates/leadframes (6) comprising the steps of; providing vertically stacked molding die layers 87 stacked one above the other with die halls between the stacked die layers and a die hall in a top die layer (see figure 105); providing semiconductor substrates with semiconductor assemblies M between said vertically stacked layers; and flowing molding compound 65 through said top layer into the substrate/leadframe in the top die section and from the top die section through die halls between stacked die layers to the other substrate/leadframes between stacked layers (see figure 87). The flowing step includes runners or channels for distributing molding compounds in the die sections and the flowing step includes a press rod 64 for pressing the molding compound through said die hall in said top die (see figure 87).

Conclusion

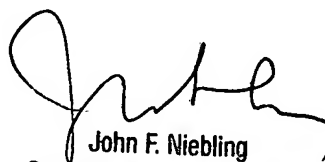

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ross and Plummer et al. disclose methods of molding stacked semiconductor assemblies.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angel Roman whose telephone number is (571) 272-1681. The examiner can normally be reached on Monday-Friday 8:00am-5:00pm.
